Țurcanu Răzvan

romanian, 27 years old
I currently live in Sibiu, Romania

Personal Statment

One could say that I am made of very different material than most people in the IT sector. Having graduated the Architecture and Urbanism University [sept.2013], I have been adapting the 'architects skillset' for this new blooming environment. What I may lack in technical skill I gain in resourcefulness, creative nature, appetite for design and good communication skills. Under these circumstances I am seeking a position where I can further develop my skills.

Desired Position

ui/ux designer
front end developer
interaction designer

Relevant Skills Certifications

PERSONAL:
resourcefull, creative, accurate communication skills , initiative, empathy (identifying with users), very adept at learning

TECHNICAL:
HTML, CSS, javascript, jQuery, Modernizr, Bootstrap, responsive design, cross-browser development, photoshop / illustrator, obsessed with performance and optimization, asp.net, mvc

COMPLEMENTARY:
fluent in english, graphic design, product design, keen eye for detail, interested in philosophy, psichology, art (eg: gestalt theory)

MICROSOFT 070-480 CERTIFICATE:
Programming in HTML5 with JS and CSS3

MICROSOFT 070-486 COURSE:
Developing ASP.NET MVC Web Applications

CERTIFICATE OF PROFICIENCY IN ENGLISH
by The University of Cambridge

I AM INTERESTED IN LEARNING:
- single page aplications - angular.js,
- working with CMS,
- management skills

Work Experience

march 2014 - present

UI DESIGNER AND DEVELOPER at **MI-PAY PLC** , SIBIU

- front end development in .NET MVC for payment service apps - O_2 , Vodafone UK, 3Ireland
- re-design of ui and optimizing for mobile and other devices (responsive design)
- consulting for clients and other 3rd parties on design and integration
- produce articles on internal best practices and ui/ux recomendations

dec. 2012 - feb. 2013 **ARCH. INTERNSHIP** at **"SZENDE SZENTESI INDIVIDUAL ARCH. PRACTICE"** , Cluj-Napoca

july - august 2012 **ARCH. INTERNSHIP** at **"N2 ARHITECTURA"** , Cluj-Napoca

july - august 2011 **ARCH. INTERNSHIP AT "SC. HUBERTUS"**, Sibiu

- I consider my architectural studies/activity to have been a highly instructive experience:
- leared to integrate different fields of activity
- refined teamwork and communication skills
- design skill, empaty for end users
- developed creativity, problem solving skills, search outside of box for solutions

Education

2007 - 2013 **UNIVERSITY OF ARCHITECTURE AND URBANISM ,** Cluj-Napoca

Architect Degree (Bachleor + Masters in Urban Planning, 4+2 years)

1995 - 2007 **„OCTAVIAN GOGA" NATIONAL COLLAGE**, Sibiu

Bacalaurate, Capacity Certificate, Professional Certificate in C++ Programming

Recomandations

Attached I have provided letters of recomandation from a few people, whom I have worked with:
- arh. Andrei Nejur - owner of 'N2 arhitectura'
- arh. Szende Szentesi - owner of individual architectural practice
- Catalin Mihacea -former head of development and test at Mi-Pay PLC

References

For references, I will provide contact information, on demand, for all of the above, and also for my current supervisor:
- Allen Atwell - CEO and head of development and test departments, at Mi-Pay PLC

Samples of work

OPTIMIZE STUDIO
- my creative corner, I feel this work best represents me- so view it as 'my portfolio'
- it is here where I come, to try out ideas, modular approach
- mobile-optimised (beta, for now)
- inspirational, I often use it as a pick-and-choose library of front-end parts
- could be used as demo for clients
- check out the "Portfolio section" for some of my other works
- http://ux-architect.github.io/demo

ARCHITECTURE PORTFOLIO
- here are some of my non-web designs, mostly architecture projects from my studies
- architecture design, renderings, 3d models, technical details, contest entries, etc
- my first attempt at web-design: simple html, css and js - responsive, but not mobile-optimised
- http://ux-architect.github.io/demo/arh

PAYMENT APP CONCEPT
- Mi-Pay concept product - Mi-Pay is my current workplace
- part of internal effort to standardize relationship with clients - both technically and aesthetically
- mobile-optimized app
- modular: each feature is developed as modular unit - easier to maintain and test
- aimed at improving estimation accuracy, standardising internal work flow
- enforces own company product and trade
- http://ux-architect.github.io/demo/lite
